

City of Rock Hill Equipment Reimbursement Rates

In situations when the City of Rock Hill uses vehicles and/or equipment for disaster recovery, the City will calculate reimbursement rates according to the Federal Emergency Management Agency's Schedule of Equipment Rates. The rates will be based on the FEMA rates that were in place at the time the equipment was used. Staff should keep clear records of what equipment was used, when it was used and for how long. The City's Fleet Division can then assist with determining the appropriate rates to charge.
