

## HOW TO CALCULATE COMMERCIAL BUILDING PERMIT FEES

A single permit will be issued for new construction and major renovation projects. The prime contractor is responsible for providing the name, business license number, and state license number for the plumber, electrician, mechanical, gas piping and fire sprinkler subcontractors.

For structures, the valuation of any proposed construction will be determined either by contract price indicated on the permit application or by utilizing the per square foot value determined from the Standard Building Valuation Data table published by the International Code Council in the month of June each year, whichever is greater. The most recent June publication will be used. This value will then be applied to the fee schedule.

The current fee schedule is listed below:

<b>Total Valuation</b>	<b>Fee</b>
\$1,000.00 and less	\$35.00
\$1,001.00 to \$200,000.00	\$35.00 for the first \$1,000.00 plus \$5.00 for each additional \$1,000.00 or portion thereof, to and including \$200,000.00
\$201,000.00 to \$1,000,000.00	\$1,030.00 for the first \$200,000.00 plus \$3.00 for each additional \$1,000.00 or portion thereof, to and including \$1,000,000
\$1,001,000.00 and above or portion thereof	\$3430.00 for the first \$1,000,000.00 plus \$2.00 for each additional \$1000.00 or portion thereof

The current per square foot values from the Standard Building Valuation Data table from the ICC are as follows for a new building with occupancy groups M and S-1, type IIB construction:

M	\$116.21
S-1	\$86.20

To view the data table from the ICC, you can visit their website at [www.iccsafe.org/cs/techservices](http://www.iccsafe.org/cs/techservices).

To determine the value for a new commercial building with these occupancy types see the example below:

24,288 sq. ft. - M	24,288 x \$116.21 =	\$2,822,508.48
10,640 sq. ft. - S-1	+ 10,640 x \$86.20 =	\$917,262.20
	<b>Total Value</b>	<b>\$2,833,234.68</b>

Note: For shell only buildings, the valuation will be reduced by 20%.

This value or your contract amount, whichever is greater, is applied to the fee schedule above. The calculated Permit Fee is **\$7098**.

For any plans that go through commercial plan review, a plan review fee is charged with the permit. The plan review fee is 25% of the calculated permit fee.

Plan Review Fee	\$7098 x 25% =	\$1775
+ Permit Fee		\$7098
<b>Total Permit Fee</b>		<b>\$8873</b>

### **Penalty for Work Without a Permit**

When work for which a permit is required is commenced before obtaining a permit, the Building Official shall charge a double fee before the issuance of the required permit.
